Archaeological data – The study of the human past using material remains – The study of human behaviour revealed through material culture – Archaeology is not history without texts! – What is material culture? – What can it reveal? – Archaeology is the discipline with the theory and practice for the recovery of unobservable ...

### **What is archaeology? 1: the nature of archaeological data**

Archaeology 101 Introduction Archaeology is the study of past cultures through the material (physical) remains people left behind. These can range from small artifacts, such as arrowheads, to large buildings, such as pyramids. Anything that people created or modified is part of the archaeological record.

tion of the natural world more generally. 2 But a wealth of evidence shows that trees carried a range of meanings beyond the straightforwardly practical and economic. Scholars have noted, for example, that trees, especially oaks, were valued in the eighteenth century as emblems of landownership, patriotism, and the future stability of the 1.

### **An Archaeology of Natural Places: Trees in the Early**

Archaeomineralogy covers the stones component of this phrase. Of course, archaeology consists of a great deal more than just stones and bones. Contemporary archaeology is based on stratigraphy, geomorphology, chronometry, anthropology, and a host of other disciplines in addition to those devoted to stones and bones (Rapp and Hill 2006).

archaeology and also by the "objectively" oriented postmodern archaeology. Each has found in this concept inspiration for the expansion of its paradigms. Landscape archaeology is an alternative to the tradition of settlement archaeology, particularly in three senses: First, it operates with data from a larger contiguous

### **Landscape Archaeology - Encyclopedia of Life Support Systems**

archaeology, as we know it, can be situated in the 19th century when the age of the human being was recognised and demonstrated and the bases for current research techniques and methodologies set. In the 1960s, the new archaeology revolutionised this tradition of historical classification and a completely scientific discipline was proposed.

In working to achieve these goals, modern archaeology seeks to contribute to the better understanding of how we as a community, state, nation, and humanity as a whole came to be. Archaeology, with other social and natural sciences, presents us with a fuller understanding of who we are and where we came from.
