

biodiversity dynamics and conservation pdf

Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.

Biodiversity - Wikipedia

A biodiversity action plan (BAP) is an internationally recognized program addressing threatened species and habitats and is designed to protect and restore biological systems. The original impetus for these plans derives from the 1992 Convention on Biological Diversity (CBD). As of 2009, 191 countries have ratified the CBD, but only a fraction of these have developed substantive BAP documents.

Biodiversity action plan - Wikipedia

Environmental DNA (eDNA) can be obtained from ancient and modern environments. Coupled to DNA metabarcoding, eDNA is a powerful means of biodiversity monitoring.

Environmental DNA – An emerging tool in conservation for

The loss of biodiversity is increasing. There is massive extinction from human activity. For example, fish stocks are dwindling, forest loss is resulting in the loss of many species, land and other resources are being misused, leading to various long term costs.

The Environment Sector Research, Development and Evidence (R,D&E) framework was approved by MINMEC on 08 June 2012. This document addresses the need for a common framework for the collection of solid evidence that can be used in support of environment sector policy decisions and for the achievement of sector priorities.

1. Introduction. Conservation is closely aligned with modern ecological thinking and over the last two centuries has become a major factor in policy decisions (Klein et al., 2009; Keppel et al., 2015). Before the arrival of the modern ecology-motivated concept, conservation has been practiced for many centuries in a variety of more traditional, community-based forms (Malhotra et al., 2007).

Quantifying the conservation value of Sacred Natural Sites

Charudutt Mishra is the Science and Conservation Director of the Snow Leopard Trust, responsible for guiding research and conservation programmes in snow leopard range countries of Asia. He also serves as the Executive Director of the Snow Leopard Network, a worldwide organization of leading snow leopard experts and over 500 member individuals and institutions.
