Mountaintop coal mining is a surface mining practice involving removal of mountaintops to expose coal seams, and disposing of associated mining overburden in adjacent "valley fills." Valley fills occur in steep terrain where there are limited disposal alternatives.

## **Coal mining - Wikipedia**

The practice of mountaintop removal mining has been controversial. The coal industry cites economic benefits and asserts that mountaintop removal is safer than underground mining. [citation needed] Published scientific studies have found that mountaintop mining has serious environmental impacts that mitigation practices cannot successfully address.
