Common Rail Diesel Fuel Systems Fuel rail pressure control valve solenoid Rail pressure control valve (solenoid) Fuel return The valve controls fuel pressure by opening and closing a return port in the rail. Excess fuel returns to the fuel tank via the fuel return. A rail pressure control valve solenoid is fitted to the common rail on some systems.

Common rail direct fuel injection is a direct fuel injection system for diesel engines. On diesel engines, it features a high-pressure fuel rail feeding individual solenoid valves, as opposed to a low-pressure fuel pump feeding unit injectors. Third-generation common rail diesels now feature piezoelectric injectors for increased precision, with fuel pressures up to 2,500 bar. In petrol engines, it is used in Gasoline direct injection engine technology.
