

### **computer aided and integrated pdf**

Computer-aided design (CAD) is the use of computer systems (or workstations) to aid in the creation, modification, analysis, or optimization of a design. CAD software is used to increase the productivity of the designer, improve the quality of design, improve communications through documentation, and to create a database for manufacturing. CAD output is often in the form of electronic files ...

### **Computer-aided design - Wikipedia**

Overview. Computer-integrated manufacturing is used in automotive, aviation, space, and ship building industries. The term "computer-integrated manufacturing" is both a method of manufacturing and the name of a computer-automated system in which individual engineering, production, marketing, and support functions of a manufacturing enterprise are organized.

### **Computer-integrated manufacturing - Wikipedia**

This is the complete automation of a manufacturing facility such as a factory. All functions are under computer control. This starts with computer aided design, followed by computer aided manufacture, followed by automated storage and distribution.
