Orienteering is a group of sports that requires navigational skills using a map and compass to navigate from point to point in diverse and usually unfamiliar terrain whilst moving at speed. Participants are given a topographical map, usually a specially prepared orienteering map, which they use to find control points. Originally a training exercise in land navigation for military officers ...

Orienteering - Wikipedia

Bird migration is the regular seasonal movement, often north and south along a flyway, between breeding and wintering grounds. Many species of bird migrate. Migration carries high costs in predation and mortality, including from hunting by humans, and is driven primarily by availability of food. It occurs mainly in the northern hemisphere, where birds are funneled on to specific routes by ...

02 Market and Industry Trends. Relatively inflexible baseload generators, such as coal and nuclear power plants, have always been complemented by FLEXIBLE GENERATION to adapt the electricity supply to time-variable demand. Hydropower and other dispatchable renewables such as bio-power, and concentrating solar thermal power (CSP) with thermal storage offer flexible renewable energy generation ...
