1. Introduction. Recently a significant progress has been achieved in the study of P-V-T properties of minerals and other materials in relation to the Earth and planetary mantle and core (Bassett, 2009, Hemley and Percy, 2010, Dubrovinsky et al., 2015). The major experimental techniques are diamond anvil cells and multianvil apparatus.

Microsoft excel spreadsheets for calculation of P-V-T

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.
