Bees pollinate important food crops, and honeybees provide people with honey. Wasps, although we usually think only about their stings, are also beneficial. If you'd like to do something other than reach for a spray can of poison to deal with stinging bees and wasps, try these tips.

Bees & Wasps - Northwest Center for Alternatives to Pesticides

This beekeeping for beginners guide will give you step by step instructions on how to start beekeeping successfully even if you're an absolute beginner. You can get started today on honey bee farming even in your own backyard.

Beekeeping For Beginners | Honey Bee Farming | Backyard

Evaluation Instructions Setting Up You will need the following materials: Student passages that the student will read (included in this packet). Placement worksheets for scoring the student (included in this packet).

One Minute Reader Placement Guide

Beekeeping (or apiculture) is the maintenance of bee colonies, commonly in man-made hives, by humans. Most such bees are honey bees in the genus *Apis*, but other honey-producing bees such as *Melipona* stingless bees are also kept. A beekeeper (or apiarist) keeps bees in order to collect their honey and other products that the hive produces (including beeswax, propolis, flower pollen, bee pollen ...

What Happened To The Bees This Spring? Part 1: Environmental and Biotic Factors. Randy Oliver ScientificBeekeeping.com. By now, most everyone has heard that honey bee colonies died in massive numbers this winter.

What Happened To The Bees This Spring? @ Scientific Beekeeping

A beehive is an enclosed structure man-made in which some honey bee species of the subgenus *Apis* live and raise their young. Though the word beehive is commonly used to describe the nest of any bee colony, scientific and professional literature distinguishes nest from hive. Nest is used to discuss colonies which

house themselves in natural or artificial cavities or are hanging and exposed.

Beehive - Wikipedia

The following findings are divided into three sections. In the first section, we present clearly documented information about neonicotinoid impacts on bees, i.e., facts that are supported by an extensive body of research.

The Xerces Society How Neonicotinoids Can Kill Bees

CSU Extension - A division of the Office of Engagement. Providing trusted, practical education to help you solve problems, develop skills and build a better future.

This past fall, I received many reports and questions about absconding bees, perhaps fifty in all. Every year I get these and I must admit that I've always taken the beekeepers' word for it when they said their bees absconded. But this year I realized the sheer number of reports was off-kilter somehow.

Absconding bees or death by Varroa? - Honey Bee Suite

Bees really are awesome! No doubt you have heard at least some ideas about why bees matter, but here is a list of ten reasons why bees are important and beneficial for humanity and the environment.

10 Reasons Why Bees Are Important...(and awesome!)
