

study in applied geomorphology pdf

Mapping point data usually involves some sort of interpolation. There are many point-interpolation methods out there (contours, IDW, TIN, tension spline, kriging, trend surface, etc.) as well as non-interpolation methods for displaying point values (proportionally-sized circles).

Thiessen & Isohyetal Precip | GIS 4 Geomorphology

Planetary science or, more rarely, planetology, is the scientific study of planets (including Earth), moons, and planetary systems (in particular those of the Solar System) and the processes that form them. It studies objects ranging in size from micrometeoroids to gas giants, aiming to determine their composition, dynamics, formation, interrelations and history.

Ecology (from Greek: *oikos*, "house", or "environment"; *-logia*, "study of") is the branch of biology which studies the interactions among organisms and their environment. Objects of study include interactions of organisms with each other and with abiotic components of their environment. Topics of interest include the biodiversity, distribution, biomass, and populations of organisms ...
