A breast implant is a prosthesis used to change the size, shape, and contour of a woman's breast. In reconstructive plastic surgery, breast implants can be placed to restore a natural looking breast mound for postâ€“mastectomy breast reconstruction patients or to correct congenital defects and deformities of the chest wall. They are also used cosmetically to enhance or enlarge the appearance of ...

1. Ontological Naturalism 1.1 Making a Causal Difference. A central thought in ontological naturalism is that all spatiotemporal entities must be identical to or metaphysically constituted by physical [] entities. Many ontological naturalists thus adopt a physicalist attitude to mental, biological and other such â€œspecialâ€• subject matters.

X-ray crystallography is a technique used for determining the atomic and molecular structure of a crystal, in which the crystalline structure causes a beam of incident X-rays to diffract into many specific directions. By measuring the angles and intensities of these diffracted beams, a crystallographer can produce a three-dimensional picture of the density of electrons within the crystal.
