Evolution is a flexible word.<sup>2</sup> It can be used by one person to mean something as simple as change over time, or by another person to mean the descent of all life forms from a common ancestor, leaving the mechanism of change unspecified.

### **Darwin's Black Box: The Biochemical Challenge to Evolution**

These theories are really actually quite absurd, enough to challenge the theory of evolution. The two main theories are the arboreal theory, where creatures developed wings by jumping/gliding from branch to branch, and the cursorial theory, where wings were developed by creatures jumping from the ground up.
