Introduction and Theoretical Framework

A chemical element is a species of atoms having the same number of protons in their atomic nuclei (that is,

the same atomic number, or Z). 118 elements are identified, of which the first 94 occur naturally on Earth with the remaining 24 being synthetic elements. There are 80 elements that have at least one stable isotope and 38 that have exclusively radionuclides, which decay over time into ...

We consider a random variable x and a data set $S = \{x_1, x_2, \dots, x_n\}$ of size n which contains possible values of x . The data set can represent either the population being studied or a sample drawn from the population. The mean is the statistic used most often to characterize the center of the data in S . We now consider the following commonly used measures of variability of the data around the ...
