As hackers and their tools become increasingly advanced, no network is completely impenetrable. Security professionals must realize this and be prepared when the inevitable breach does occur. Not having a strong incident response strategy in place puts an entire organization much more at risk –including its customers, employees, and partners.

Greenland is the world's largest island and has the majority of its land covered in ice. Greenland is 2,166,086 square kilometers, with 410,449 square kilometers ice free and 1,755,637 square kilometers covered completely with ice. Because it is such a large island, Greenland has an expansive 44,087 square kilometer coast line.
