Ecology (from Greek: $\acute{\alpha}\lambda\omicron\gamma\acute{\alpha}$, "house", or "environment"; $\sigma\upsilon\lambda\lambda\omicron\gamma\eta$, "study of") is the branch of biology which studies the interactions among organisms and their environment. Objects of study include interactions of organisms with each other and with abiotic components of their environment. Topics of interest include the biodiversity, distribution, biomass, and populations of organisms ...

Introduction. Past research has shown that marijuana use occurs commonly in social situations for young adults, though few studies have examined the association between immediate social context and marijuana use patterns and associated problems.

Does social context matter? An ecological momentary

A worldview, conceptual framework, or model is a critical component of one's vision of the possibilities for human learning and development as it defines the important variables to consider and the relationships among those variables. There are a number of different philosophical positions that provide a foundation for organization and interpretation of empirical data into models.
